# ICE CONTROL SOLUTIONS

## **XMELT**

XMelt Ice Melter was designed for the high-performance needs of snow professionals. XMelt is coated with organic corrosion inhibitors, greatly enhancing the melting capability of chloride based ice melters. It requires fewer applications and keeps snow and ice from bonding to pavement. Extra-strength blend with fast-acting melting power to -20°F!

## **QUAD SELECT**

Formulated with Calcium, Magnesium, Sodium, and Potassium Chlorides for fast acting melting power. Melts to -15°F and helps prevent re-freezing. Blue color to aid coverage control.

## **DUOMELT**

Unique sized sodium chloride crystal enhanced with magnesium chloride coating that promotes Rapid Melting Response and is less corrosive. Effective to temperatures down to -5°F. Purple color provides higher visibility for optimum coverage and aids in over-coverage.

## **ROCK SALT**

Fast acting, superior melting power. Multiple-sized crystals allow the smallest crystals dissolve quickly while the larger crystals last longer, reducing the amount of rock salt needed to get the job done. Easy to apply. It may be safely used on most surfaces ranging from blacktop, wood, stone, and gravel to properly cured air-entrained concrete.

## **MAGNESIUM CHLORIDE PELLETS AND FLAKES**

Used as a de-icing agent for winter maintenance. Easy to spread in winter-maintenance applications. Pellets preferred for direct application by road authorities. Flakes are a preferred dust suppressant on roads and building sites.

## **CALCIUM CHLORIDE PELLETS AND FLAKES**

Used for de-icing.

# SAND & CONSTRUCTION SOLUTIONS

## AGGREGATES

Various Stone materials used for many applications which include Drainage, Bridging Material, Erosion Control, Stream Bank Stabilization among many additional uses.

### *Pea Gravel*

Washed Rounded Gravel used for Drainage

### *Drainage/Rice Gravel*

Smaller Gradation than the Pea Gravel.  
More angular material makes this product great for a Bridge Material.

### *Washed Blue #8 Aashto Gravel*

Excellent Material for Better Billy Bunker applications as well as a Bridging Material.

### *Nature Trail Pathway Mix*

Blend of Stone and Clay Binders make this a great material for walking and riding paths

### *Rip Rap*

Various sizes of Rip Rap from R-3 to R-8

### *Crusher Run*

A compatible material used as a base underneath Asphalt and Concrete Applications.

### *#57 Stone*

Aggregate used in asphalt mixes and stone driveways

## BUNKER SAND

### *SF35*

The Highest Quality Bright White Bunker Sand on the Market. Manufactured to higher angularity, the Coarser Gradation provides superior steep bunker face holding capacity. Penetrometer and Perc Rates higher than the standard rating.

### *Premium White Bunker Sand*

High quality manufactured white Bunker Sand.  
Consistent Gradation that is finer than SF35

## BUNKER SAND (CONT.)

### *SF35 Beige*

The Highest Quality Beige Bunker Sand on the Market. Manufactured to higher angularity, the coarser Gradation provides superior steep bunker face holding capacity. Penetrometer and Perc Rates higher than the standard rating.

### *Bunker Blend Bunker Sand*

A Mined Economical choice for Beige Colored Bunker Sand.

### *VUPD White*

A Mined White Sand for the Lower Virginia Area

### *AI Beige*

A Mined Beige Bunker Sand for the Lower Virginia Area

### *Newport Beige*

A Mined Beige Colored Bunker Sand originating from the New Jersey Area.

## BLENDED MATERIALS

Sand Blends that include a mixture of USGA Spec Sand, Peat, Topsoil and/or other materials. These materials are commonly used for Greens And Sportsfield Construction, Tee Construction and Drainage Projects. Stock materials are readily available. Custom Blends mixed upon request and specification. Additional materials may also be included into these blends that include Profile, BioChar, Micro Nutrients and others.

### **Sand Peat Mixtures**

Common Mixtures: 90/10 and 85/15

### **Sand Soil Peat Mixtures**

Common Mixtures: 7/2/1 and 6/2/2

## DIVOT MIXES

Divot Mixes are Blends that can include Organic Material to provide enhanced soil moisture allowing for seed germination. Divot Mix Material also includes Straight Dry Sterilized Sand that can be a Dyed Green Color or Natural. Material can be purchased in bulk, 1 Ton Sacks and 50# Bags.

## TOPDRESSING SANDS

Routine Topdressing programs will help breakdown thatch layers while helping to smooth the turf surfaces. Topdressing Sands can also help relieve compaction layers during the aerification process and modify your soil profile. An evaluation of the current soil content is always helpful in determining the correct Topdressing to use. Genesis Sands can help determine the correct Gradations for your applications whether it be for Topdressing Greens, Fairways or Sportsfield. There are many types of sands available that include USGA Spec Sands both Dry and Damp. Ask your Genesis Rep to help with the proper selection of Topdressing for your specific application.
