

SAND & CONSTRUCTION SOLUTIONS

AGGREGATES

Various Stone materials used for many applications which include Drainage, Bridging Material, Erosion Control, Stream Bank Stabilization among many additional uses.

Pea Gravel

Washed Rounded Gravel used for Drainage

Drainage/Rice Gravel

Smaller Gradation than the Pea Gravel. More angular material makes this product great for a Bridge Material.

Washed Blue #8 Aashto Gravel

Excellent Material for Better Billy Bunker applications as well as a Bridging Material.

Nature Trail Pathway Mix

Blend of Stone and Clay Binders make this a great material for walking and riding paths

Rip Rap

Various sizes of Rip Rap from R-3 to R-8

Crusher Run

A compatible material used as a base underneath Asphalt and Concrete Applications.

#57 Stone

Aggregate used in asphalt mixes and stone driveways

BUNKER SAND

US Genesis White

Manufactured High Quality White Bunker Sand

SE Bunker Pro Premium Bunker Sand

Mined out of Southern Virginia. Whitish in color

Genesis Divot Fix (Repair Soil)

50/50 Sand Topsoil

Genesis Divot Fix Army Green

100% Dry Sand Army Green

DivotGro

Mixed with Terra-Gro Pro Select Compost- 70/30 blend available in Natural Tan or Green.

BLENDED MATERIALS

Sand Blends that include a mixture of USGA Spec Sand, Peat, Topsoil and/or other materials. These materials are commonly used for Greens And Sportsfield Construction, Tee Construction and Drainage Projects. Stock materials are readily available. Custom Blends mixed upon request and specification. Additional materials may also be included into these blends that include Profile, BioChar, Micro Nutrients and others.

Sand Peat Mixtures

Common Mixtures: 90/10 and 85/15

Sand Soil Peat Mixtures

Common Mixtures: 7/2/1 and 6/2/2

TOPDRESSING SANDS

Routine Topdressing programs will help breakdown thatch layers while helping to smooth the turf surfaces. Topdressing Sands can also help relieve compaction layers during the aerification process and modify your soil profile. An evaluation of the current soil content is always helpful in deterring the correct Topdressing to use. Genesis Sands can help determine the correct Gradations for your applications whether it be for Topdressing Greens, Fairways or Sportsfield. There are many types of sands available that include USGA Spec Sands both Dry and Damp. Ask your Genesis Rep to help with the proper selection of Topdressing for your specific application.

USGA Damp Sand

Dry Topdressing Sand

Fairway Topdressing Sand

Sportsfield Topdressing Sand

MULCH & COMPOST
